

I am writing in regards to the possibility of you allowing LPFM stations to take priority over current FM translator service. I listen to a station called AIR 1 and it serves me greatly as a resident in my local community. There is no local station that can give me the kind of music and information that I receive from AIR 1. The effect on this community is that we would be left with no other similar option to listen to. I believe that AIR 1 is in the public's best interest because it is a station that offers positive and encouraging music and commentary in a sometimes hard to live in world. I hope you decide AIR 1 is as important as I do and that you allow it to remain where it is. Thanks for your time, RaeAnn Suckow
